Asbestos

Asbestos Australia are able to assist and generate practical solutions for the safe removal and disposal of Asbestos.

Through many years of experience, we have an exceptional track record for delivering full spectrum services with flexibility in adapting from commercial project specific requirements to residential removals.

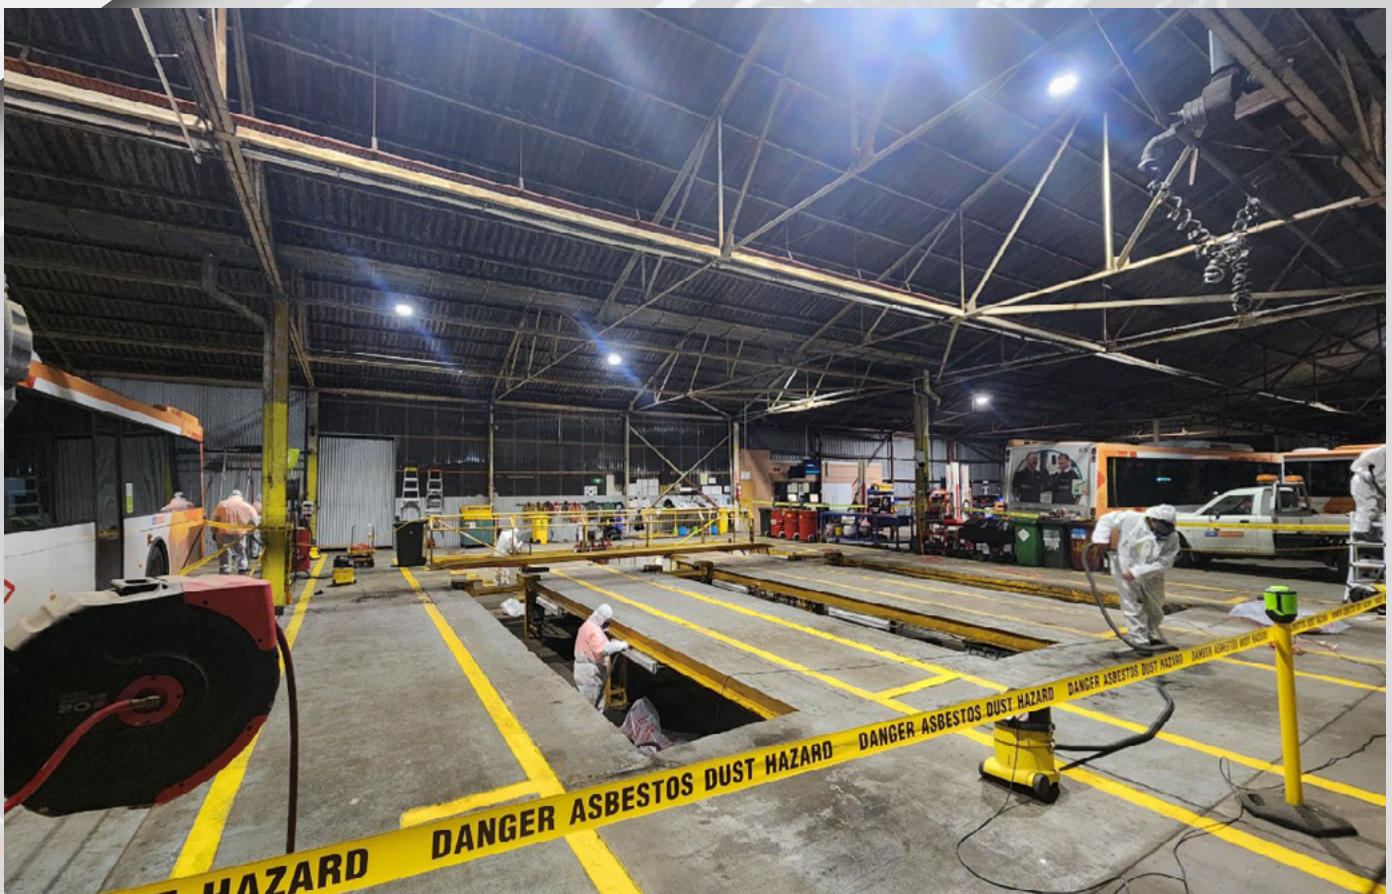

Our management team is involved throughout the complete process to ensure seamless and safe results. Large or small, every removal is treated with safety being of paramount importance.

Class A Friable

Friable asbestos is high risk. Friable asbestos can be crumbled, pulverised or reduced to a powder by hand pressure.

Class B Non Friable

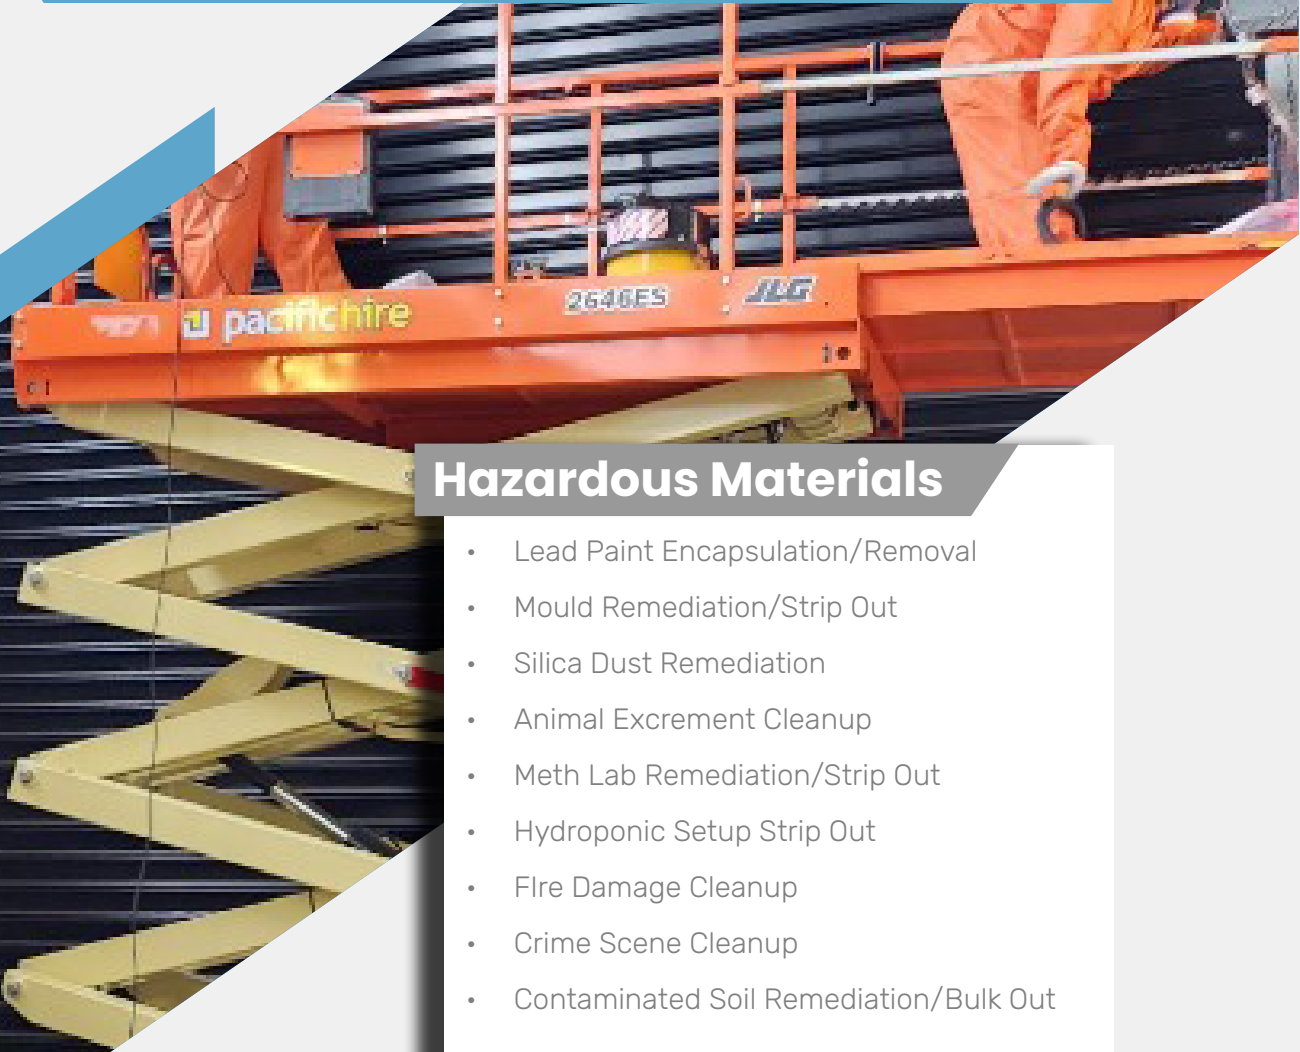

Non-friable asbestos is lower risk. It is mixed with cement or other hard bonding materials. Non-friable asbestos can become friable if damaged or old.

Services

Our services are not limited to Asbestos removal.

Our capabilities range from other hazardous materials to demolition.
